College Station, Texas • (979) 436-5736 • amir.m@tamu.edu • Scholar • LinkedIn • Website

PROFILE SUMMARY

Doctoral researcher in Computer Engineering with demonstrated success in developing AI-driven solutions for time-series and acoustic data. Experienced in neural networks, transformer-based transfer learning, and physics-informed modeling for biomedical applications and audio data.

EDUCATION

Texas A&M University, College Station, Texas December 2026 (anticipated)
Doctor of Philosophy in Computer Engineering

Sharif University of Technology, Tehran, Iran February 2021
Master of Science in Electrical Engineering

University of Tabriz, Tabriz, Iran September 2018
Bachelor of Science in Electrical Engineering

EXPERIENCE

Texas A&M University, College Station, Texas January 2024 – Present

Graduate Research Assistantship, Advisor: Prof. Joshua Peeples

- Developed a feature engineering method for time-delay neural networks, achieving higher 7% accuracy on time-frequency acoustic data.
- Introduced the histogram-based parameter-efficient transfer learning method for transformer models, reducing tunable parameters compared to adapters and improving training convergence.
- Contributed to cross-domain knowledge transfer learning applications of acoustic data using pre-trained ImageNet and AudioSet models and explainable AI.

Texas A&M University, College Station, Texas September 2022 – December 2023

Graduate Research Assistantship, Advisor: Prof. Roozbeh Jafari

- Analyzed physiological time-series signals with AI models and physics-informed neural networks for cardiovascular dynamics, decreasing required ground truth by an average factor of 15.

Sharif University of Technology, Tehran, Iran July 2019 – February 2021

Graduate Student, Advisor: Prof. Mohammad Fakharzadeh

- Developed low-power sensor for human mental stress diagnosis using supervised algorithms.
- Designed the schematics and PCB, programmed the microcontroller, conducted the data collection.

COMPUTATIONAL SKILLS

Python, PyTorch (Lightning), TensorFlow, and MATLAB were used for AI/ML assistantship projects.

C, Java, HSPICE, Cadence, and Altium Designer were used for electrical and electronics course projects.

JOURNAL PAPERS

1. Sel, K., **Mohammadi, A.**, Pettigrew, R. I., & Jafari, R. (2023). Physics-informed neural networks for modeling physiological time series for cuffless blood pressure estimation. *Nature NPJ Digital Medicine*, 6(1), 110. [link]

2. **Mohammadi, A.**, Fakharzadeh, M., & Baraeinejad, B. (2022). An integrated human stress detection sensor using supervised algorithms. *IEEE Sensors Journal*, 22(8), 8216-8223. [link]

POSTER PRESENTATIONS

1. **Mohammadi, A.**, Masabarakiza, I., Barnes, E., Carreiro, D., Van Dine, A., & Peeples, J. (2024, April). Investigation of Time-Frequency Feature Combinations with Histogram Layer Time Delay Neural Networks. Poster session presented at the *Electrical & Computer Engineering Graduate Spring Poster Event*, College Station, TX.
2. **Mohammadi, A.**, Sel, K., Pettigrew, R. I., & Jafari, R. (2023, October). Physics-Informed Neural Networks for Modeling Cardiovascular Dynamics. Poster session presented at the *2023 AI in Health Conference*, Houston, TX.

PREPRINTS

LEADERSHIP & SERVICE

Peer-Review and Conference Support:

- Served as Reviewer for IEEE ICASSP 2023, providing feedback on three paper submissions.
- Acted as a Helper/Area Chair for Applied Signal Processing Systems at IEEE ICASSP 2024, helping manage the peer-review process and reviewer assignments.

Project Mentorship:

- Guided an undergraduate student on a Diffusion Generative AI research project during Fall 2024 and Spring 2025, offering training on model development and evaluation techniques.

Teaching Support:

- Graded coursework in Principles of Electronics, providing timely feedback.
